( .....and a few other interesting facts!)

Issue No 2— December 2012

Welcome to the second edition of our company newsletter. Keeping you informed of the latest news and developments here at Viridian Consulting Engineers Limited.

## The Fuseliers Museum, Bury

We are delighted to announce our involvement in the new refurbishment project at The Fuselier Museum in Bury. This project will comprise the refurbishment of the 1st floor to create a new open store collection, archive space and function area with commercial kitchen facilities. The services will include close control for the collection areas along with low energy, flexible display lighting. The project is at the early stages of design in what promises to be an exciting development to expand the Museum's facilities.

## Belvedere Academy, Liverpool

We have recently completed the design of the Mechanical and Electrical Engineering services to the new dining room extension and refurbishment works at Belvedere Academy in Liverpool. This will comprise modifications to the existing Mechanical and Electrical services within the refurbished areas, to create new Seminar rooms, ICT Suite and a single storey Dining Room extension. These works are to be carried out whilst the Academy remains fully operational.

## Leeds Bradford International Airport

Two further projects, The Saltaire Bar and Camden Food Co, have recently been completed for the travel concession operator SSP at Leeds Bradford International Airport. Viridian's Engineers have provided the Mechanical and Electrical services design to both units including a full commercial kitchen for Saltaire. Both these projects have enabled our Engineers to draw on their already extensive experience in the Food and Leisure sectors.

### The Saltaire Bar

Taking it's name from the nearby town and world heritage site famous for its architecture, food and award winning beers. This "Bar & Eatery" has been specifically designed to offer travellers a taste of Yorkshire.

### Camden Food Co

This will be the first outlet that the Camden Food Co has opened at a major UK airport. Focusing on the provision of a modern and healthy approach to "grab-and-go" food with an emphasis on sourcing local produce.

## Exam Success Widens Range of Services Offered

Our congratulations to Lee Wild who we appointed as a Carbon Consultant earlier this year. Lee, has recently been successful in becoming accredited to provide **BREEAM** assessments for the new Domestic Refurbishment Scheme.

The following **BREEAM** assessments are now all part of the extensive range of sustainable services that we at Viridian Consulting Engineers Ltd can offer.

- **BREEAM Domestic Refurbishment**
- **BREEAM Eco-Homes**
- **BREEAM Code for Sustainable Homes**
- **BREEAM Public Buildings** e.g. Education, Healthcare, Prisons, Law Courts
- **BREEAM Commercial Buildings** e.g. Offices, Industrial, Retail
- **BREEAM Multi-Residential Buildings** e.g. Residential Care Homes and Student Halls of Residence.
- **BREEAM Other Buildings** e.g. Hotels, Museums, Cinemas and Transport hubs.

In addition to the above, our highly experienced Engineering Team can offer.

- **SAP** and **SBEM** Calculations to demonstrate compliance with Part L of the Building Regulations.
- Energy Performance Certificates for both Domestic & Commercial properties.

# BREEAM®

### Did You Know???

The red suit of Santa Claus that we have all come to know and love at this time of year, only came about as a result of commercial pressures in the early 20th Century. The original colour of Santa's suit, or Saint Nicholas to call him by is traditional name was actually a shade of green.

### Viridian Green???.

Unlikely, but perhaps a hint that the man himself may have shared our company ethos!
